# Alljoints

**Alljoints** is a major advance in our ability to protect joint integrity and reduce the impact caused by growth, development, exercise and aging.

## UNIQUE FORMULATION SUPPORTING CARTILAGE METABOLISM AND REPAIR.

COMMONLY AFFECTED JOINTS

Alljoints is a valuable strategy in the maintenance of joint health in horses. Daily supplementation with Alljoints provides all the nutrients that ensure joint cartilage is nourished, supported and maintained in the best possible condition.

Alljoints provides a unique combination of proven ingredients.

### Active Constituents

Each 20g dose contains:

Collagen hydrolysate.....	2000 mg
Chondroitin sulphate.....	350 mg
Glucosamine sulphate.....	10000 mg
Green Lipped Mussel powder.....	1400 mg
Vitamin E.....	160 mg

### Directions for use

Administer 20g (1 scoop) Alljoints daily mixed into the feed.

### Collagen hydrolysate

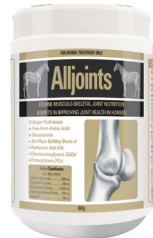

The fundamental protein of cartilage, bone, tendons and ligaments. Central role in the synthesis, repair and maintenance of joint cartilage.

### Vitamin E

Nature's own antioxidant offering protection against free radical damage.

### Chondroitin sulphate

Provides substrate for formation of healthy joint matrix.

### Glucosamine sulphate

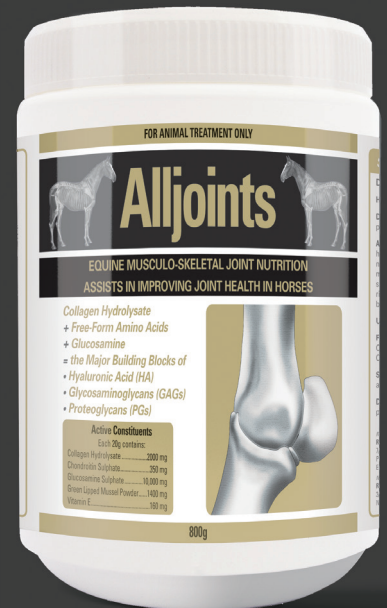

Essential for the formation of proteoglycans, one of the key components of joint cartilage and important in maintaining normal joint lubrication.

### Free-form amino acids

Providing the basic amino acid building blocks for the essential components of the joint such as joint cartilage, the joint capsule and ligaments.

### Green Lipped Mussel powder

Anti-inflammatory properties that reduce joint inflammation, pain and stiffness and improve mobility.
